

Single Gas Detector: iGAS CO₂

The iGAS CO_2 is a Single Gas Detector offering reliable and durable carbon dioxide detection in a compact, and lightweight package. iGAS CO_2 uses a low power NDIR (non-dispersive infra red) sensor to provide fast and accurate detection. Its low power consumption allows for a battery life in excess of seven days (continuous) from a single charge. iGAS is designed to withstand the harshest industrial working conditions, with an IP66/67 protection rating and delivers industry leading alarm time, changeable alarm levels and data logging. Communication is via the USB charging cable using bespoke PC software.
