Ideal for care homes

The Marsden M-600 is a hoist weighing attachment which is perfect to weigh immobile patients in care homes, hospitals and private residences.

Simple hook the M-600 to your existing hoist with a coat-hanger style attachments and you are ready to begin gaining accurate readings for your patients and residents. Simple and easy to use.

Optional connectivity options

The M-600 is available with either Bluetooth or Wi-Fi connectivity to ensure that our customers are able to transfer data seamlessly or input into EPR systems.

We would simply need to insert a connectivity module at the time of order and then provide you with our standard protocols for easy and simple integration into your existing system.

Easy to use

The M-600 features from our best-selling DP-3810 indicator. This device features from a full numeric keypad for easy BMI calculation and simple function keys.

When attaching the scale to the hoist, ensure the links are vertical and within a $\pm 5^\circ$ angle to obtain an accurate weight reading. For more information please speak to the Marsden team.
